What's in the ZIP

512/	512 px PNG stickers (iPhone, Android, WhatsApp, Telegram)
96/	96 px PNG emoji-size versions
whatsapp/	512 px WebP stickers under 100 KB + 96 px tray icon
telegram/	100 px PNG custom emoji
discord/	stickers/ 320 px PNG · emoji/ 128 px PNG

iPhone

iOS 17 or later

512/

- 1 Save a coin from 512/ to your Photos.
- 2 Open it in Photos, touch and hold the coin, then let go.
- 3 Tap Add Sticker. (Add Effect > Outline is optional.)
- 4 Send it from Messages (+ > Stickers) or the emoji keyboard. Stickers sync to your Apple devices with iCloud.

Android

Gboard

512/

- 1 Gboard can't load your own image files as a sticker pack, so the easiest way is WhatsApp or Telegram (steps on this page). They work the same on Android.
- 2 On Pixel 9 and newer, Gboard's Custom stickers > Create from photo can turn a saved coin into a sticker.
- 3 Anywhere else, share the PNG like a photo.

WhatsApp

iPhone & Android

512/ or whatsapp/

- 1 Save a coin from 512/ to your phone.
- 2 In any chat, open Stickers > Create (iPhone: Create sticker > Use a photo), pick the coin and send it.
- 3 To keep it, tap the sticker and choose Add to sticker pack.

Sticker-maker apps: use whatsapp/ (512 px WebP under 100 KB, plus tray-icon-96.png). Packs hold 3 to 30 stickers.

Telegram

any device

512/ + telegram/

- 1 Message @Stickers and send /newpack, then name your pack.
- 2 Send a 512/ PNG as a file (not a photo), then reply with an emoji. Repeat for each coin.
- 3 Send /publish, follow the prompts for an icon and a short link name, then share your pack link.

Custom emoji: /newemojipack with the 100 px files in telegram/ (using custom emoji needs Telegram Premium).

Discord

server owners & mods

discord/

- 1 You need to own the server or have the Create Expressions permission.
- 2 Server Settings > Stickers > Upload Sticker. Pick a 320 px PNG from discord/stickers/, add a name and a matching emoji.
- 3 Server Settings > Emoji > Upload Emoji. Pick 128 px PNGs from discord/emoji/.

Every server gets 5 free sticker slots (more with Boosts) and 50 emoji slots.

Share the love

- Each sticker is transparent with a white edge, so it pops on light and dark chats.
- Remix them! Share your version under the same license.
- Made a coin or a sticker post? Share it with #GardenLove and add it to the bounty board.
